

Triangles

Basic geometry - short, text-based source material

Fact 1.1

A triangle has three sides and three vertices.

Fact 1.2

The interior angles of a Euclidean triangle sum to 180 degrees.

Fact 1.3

An equilateral triangle has three equal sides.

Fact 1.4

Each interior angle of an equilateral triangle is 60 degrees.

Rectangles and squares

Basic geometry - short, text-based source material

Fact 2.1

A rectangle has four right angles.

Fact 2.2

The area of a rectangle is length multiplied by width.

Fact 2.3

A square is a rectangle with four equal sides.

Fact 2.4

A square with side length 3 cm has area 9 square centimetres.
